QUYNH TRANG NGUYEN

Graduate Web Developer | Front-End Focused

United Kingdom | quhtrang@gmail.com | +44 7930 360689 | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Graduate Web Developer with an MSc in Information Systems (Distinction) and hands-on project experience building responsive, user-centred web applications with accessibility-aware interfaces. Skilled in JavaScript, React, HTML5, CSS3, Node.js, Express.js and PostgreSQL, with experience in full-stack development, relational database design, third-party API integration and UX/UI design. Brings strong planning, stakeholder communication and problem-solving skills developed over four years in a large-scale healthcare programme.

TECHNICAL SKILLS

- **Front-End:** React, React Router, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Responsive Web Design, Accessibility Practices (WCAG 2.2 guidance)
- **Back-End:** Node.js, Express.js, EJS, JWT, bcrypt
- **Database:** PostgreSQL, SQL, Relational Database Design, Parameterised Queries, Database Transactions
- **APIs & Testing:** REST APIs, Google Calendar API, Stripe Checkout, Brevo SMTP, Jest, Supertest, Automated Unit and Route Testing, Manual Testing, Cross-Browser Testing
- **UX/UI & CMS:** Figma, Adobe Photoshop, Canva, WordPress, Wireframing, Prototyping, User Flows, Information Architecture, Heuristic Evaluation
- **Tools & Deployment:** Git, GitHub, VS Code, npm, Vite, Vercel
- **Methodologies:** Agile Development, Scrum, User-Centred Design

PROJECTS

Healthcare Booking System with Enhanced Usability | View Project

University of Portsmouth | MSc Dissertation Project **May 2025 – September 2025**

- Designed and developed a full-stack healthcare booking prototype using JavaScript, Node.js, Express.js, PostgreSQL, EJS and Bootstrap.
- Implemented city-wide appointment search, rule-based scheduling recommendations, same-practice appointment swaps with administrator approval, Google Calendar conflict checks and synchronisation.
- Implemented authentication and role-based access controls using JWT, HttpOnly cookies, bcrypt and parameterised SQL, with PostgreSQL transactions for appointment swaps.
- Defined requirements and produced user flows, wireframes, information architecture and an ERD based on academic literature, platform analysis and WCAG 2.2 accessibility guidance.
- Used an iterative workflow with two-week development cycles; performed manual functional, integration and cross-browser testing; and subsequently added 27 automated tests using Jest and Supertest for authentication, scheduling rules and selected booking, swap and admin routes.

React Developer Portfolio | GitHub

Independent Front-End Project **July 2026 – September 2026**

- Built a responsive portfolio using React, Vite and CSS3, with reusable components and React Router; subsequently added TypeScript to selected components and integrated type checking into the build.
- Developed an interactive project gallery and light/dark themes, with semantic markup, visible keyboard focus, keyboard navigation and reduced-motion support.
- Managed version control with Git and GitHub and configured automatic deployment to Vercel from the main branch.

Pompey Furniture Company Web Application | View Project

Full-Stack Team Project | Project Manager & Database Developer **March 2025 – May 2025**

- Led project planning, task allocation and delivery coordination as Project Manager while contributing to system design, database development and application integration.
- Designed use cases, role-based information architecture, wireframes, an EERD and a PostgreSQL schema for multi-showroom inventory, orders, returns, loyalty and staff operations.
- Developed and validated PostgreSQL reporting queries using joins, filtering, aggregation and grouping to analyse monthly pickup income by showroom, product availability, delivery preferences and recent returns.
- Integrated customer, staff and administrative workflows with Node.js, Express.js and PostgreSQL, then independently strengthened password storage, session-based authentication, server-side authorisation and parameterised queries while refining test-mode Stripe Checkout with server-verified product data.

WORK EXPERIENCE

Planning Officer

Ministry of Health | Vietnam **January 2020 – December 2023**

- Supported the implementation of the Local Health Care for Disadvantaged Areas Sector Development Program, a healthcare initiative funded by the Asian Development Bank and delivered across 16 provinces in Vietnam.
- Contributed to programme planning, monitoring and evaluation while preparing implementation schedules, progress reports and supporting documentation.
- Coordinated with provincial health authorities and other stakeholders to facilitate programme delivery, with additional support for training workshops, conferences and capacity-building activities.
- Designed the official programme logo used across programme materials and communications.

Web Design Intern

Profile Investment Joint Stock Company | Vietnam **January 2019 – June 2019**

- Maintained and updated WordPress website content, ensuring accuracy, consistency and alignment with business objectives.
- Applied stakeholder feedback to improve website content, visual design and user experience (UX).
- Designed website banners and digital promotional materials to support online marketing campaigns.
- Collaborated with the social media team to maintain consistent branding across the website and social media platforms.

EDUCATION

MSc Information Systems (Distinction)

University of Portsmouth | United Kingdom **2024 – 2025**

BSc Management Information Systems

Thuongmai University | Vietnam **2015 – 2019**

CERTIFICATIONS

- JavaScript Developer Certification – freeCodeCamp **June 2026**
- Responsive Web Design Developer Certification – freeCodeCamp **March 2026**
- **Webmaster Certification (WordPress)** – Vitadu Graphics Training Center **April 2024**

LANGUAGES

Vietnamese: Native | **English:** Professional working proficiency
